Sistemas y procedimientos contables

What is law? What is it for? How should judges decide novel cases when the statutes and earlier decisions provide no clear answer? Do judges make up new law in such cases, or is there some higher law in which they discover the correct answer? Must everyone always obey the law? If not, when is a citizen morally free to disobey? A renowned philosopher enters the debate surrounding these questions. Clearly and forcefully, Ronald Dworkin argues against the “ruling” theory in Anglo-American law—legal positivism and economic utilitarianism—and asserts that individuals have legal rights beyond those explicitly laid down and that they have political and moral rights against the state that are prior to the welfare of the majority. Mr. Dworkin criticizes in detail the legal positivists’ theory of legal rights, particularly H. L. A. Hart’s well-known version of it. He then develops a new theory of adjudication, and applies it to the central and politically important issue of cases in which the Supreme Court interprets and applies the Constitution. Through an analysis of John Rawls’s theory of justice, he argues that fundamental among political rights is the right of each individual to the equal respect and concern of those who govern him. He offers a theory of compliance with the law designed not simply to answer theoretical questions about civil disobedience, but to function as a guide for citizens and officials. Finally, Professor Dworkin considers the right to liberty, often thought to rival and even preempt the fundamental right to equality. He argues that distinct individual liberties do exist, but that they derive, not from some abstract right to liberty as such, but from the right to equal concern and respect itself. He thus denies that liberty and equality are conflicting ideals. Ronald Dworkin’s theory of law and the moral conception of individual rights that underlies it have already made him one of the most influential philosophers working in this area. This is the first publication of these ideas in book form.

Taking Rights Seriously

El emprendimiento es un determinante fundamental del crecimiento y la creación de empleo. Pese a que los emprendedores abundan en América Latina y el Caribe, las empresas de la región son más pequeñas y menos propensas a crecer e innovar que las de otras regiones. El crecimiento de la productividad lleva décadas siendo mediocre y el reciente period de auge de las materias primas no ha supuesto una excepción. Así pues,

la presencia de emprendedores dinámicos será necesaria para impulsar la creación de puestos de trabajo de calidad y la aceleración del crecimiento de la productividad en la región. En *El emprendimiento en América Latina*: muchas empresas y poca innovación se estudia el panorama del emprendimiento en América Latina y el Caribe. El libro recurre a nuevas bases de datos que abordan cuestiones como la creación de empresas, las dinámicas empresariales, las decisiones de exportar y el comportamiento de las corporaciones multinacionales y sintetiza los resultados de un análisis exhaustivo del estatus, las perspectivas y los retos del emprendimiento en la región. Asimismo, el libro suministra herramientas útiles e información para ayudar a los profesionales y responsables de las políticas a identificar los ámbitos de las mismas que los gobiernos pueden explorar para impulsar la innovación e incentivar el emprendimiento transformador con potencial de crecimiento elevado.

Long considered a classic in Bolivia, Juan de la Rosa tells the story of a young boy's coming of age during the violent and tumultuous years of Bolivia's struggle for independence. Indeed, in this remarkable novel, Juan's search for his personal identity functions as an allegory of Bolivia's search for its identity as a nation. Set in the early 1800s, the novel is narrated by one of the last surviving Bolivian rebels, octogenarian Juan de la Rosa. Juan recreates his childhood in the rebellious town of Cochabamba, and with it a large cast of full bodied, Dickensian characters both heroic and malevolent. The larger cultural dislocations brought about by Bolivia's political upheaval are echoed in those experienced by Juan, whose mother's untimely death sets off a chain of unpredictable events that propel him into the fiery crucible of the South American Independence

Movement. Outraged by Juan's outspokenness against Spanish rule and his awakening political consciousness, his loyalist guardians banish him to the countryside, where he witnesses firsthand the Spaniards' violent repression and rebels' valiant resistance that crystallize both his personal destiny and that of his country. In Sergio Gabriel Waisman's fluid translation, English readers have access to Juan de la Rosa for the very first time.

Climate change, a global phenomenon, has attracted scientists to contribute in anticipatory research to mitigate adverse impacts, which are more important for horticulture, considering that the scenario is in the midst of revolution, reaching the production level of 250 million tonnes in India. Impacts of climate variability have, invariably, profound influence on production and quality. An understanding of the impacts and relevant adaptation strategies are of foremost importance to sustain the productivity and profitability of horticulture crops in the climate change scenario, which necessitates synthesis of current knowledge to develop strategies for adaptation and mitigation to achieve climate-resilient horticulture. The book *Climate-resilient horticulture: adaptation and mitigation strategies* addresses the effects of climate change on different horticultural crops and focuses on the adaptation strategies based on the scientific knowledge generated by the experts in different agro-climatic regions in India. Issues have been covered in various chapters to make this book a treasure of knowledge in horticulture vis-a-vis climate change. Some of the crops included in the book are apple, grapes, cashew, banana, litchi, mango, coconut, oil palm, potato, tomato, cucurbits and flowers. In addition to strategies to be adapted in these crops, various other important aspects like carbon sequestration, pests and diseases, and urban landscaping are also covered in the book. Information on climatic risks and adaptation options for resilience in horticultural crops and future strategies and information on pest and disease dynamics on horticultural crops in relation to climate change and available mitigation strategies have also been documented. The book is edited by Dr H P Singh, a visionary leader, and his colleagues, which will be highly valuable to research workers, students, policy planners and farmers to understand and checkmate the adverse effect of climate change, so as to convert weakness into opportunity.

The existence of a Spanish and criollo landed elite and an Indian peasant mass has been the distinguishing feature of the Amerindian societies of Latin America for most of the past half-millennium. In Peru and Bolivia (colonial Alto Peru), the dominant theme in rural life was the interaction of these two groups as manifested in the relationship between the hacienda and the self-governing Indian communities (ayllus).

Latin America suffered a profound state crisis in the 1980s, which prompted not only the wave of macroeconomic and deregulation reforms known as the Washington Consensus, but also a wide variety of institutional or 'second generation' reforms. 'The State of State Reform in Latin America' reviews and assesses the outcomes of these less studied institutional reforms. This book examines four major areas of institutional reform: a. political institutions and the state organization; b. fiscal institutions, such as budget, tax and decentralization institutions; c. public institutions in charge of sectoral economic policies (financial, industrial, and infrastructure); and d. social sector institutions (pensions, social protection, and education). In each of these areas, the authors summarize the reform objectives, describe and measure their scope, assess the main outcomes, and identify the obstacles for implementation, especially those of an institutional nature.

Is a human being a person or a machine? Is the mind a social construction or a formal device? It is both,

William Frawley tells us, and by bringing together Vygotsky's sociocultural theory of the mind and cognitive science's computational model, he shows us how this not only can but must be. To do so, Frawley focuses on language, particularly on how the computational mind uses language to mediate the internal and the external during thought. By reconciling the linguistic device and the linguistic person, he argues for a Vygotskian cognitive science. Frawley begins by exploding the internalist/externalist dichotomy that presently drives cognitive science and falsely pits computationalism against socioculturalism. He replaces the reigning Platonic paradigm of computational mind-science with a framework based on an unusual, unified account of Wittgenstein, thus setting the stage for a Vygotskian cognitive science centered on three aspects of mind: subjectivity, real-time operation, and breakdown. In this context, he demonstrates how computational psychology accommodates a critical aspect of Vygotskian theory--private speech--as the mind's metacomputational regulator. An examination of certain congenital disorders (such as Williams Syndrome, Turner Syndrome, and autism) that disrupt speech further clarifies the issue of computational and cognitive control.
