In 1987, the Santiago de Compostela Declaration laid the foundations for the first Council of Europe Cultural Route, highlighting the importance of our rich, colourful and diverse European identities. Today, the Council of Europe Enlarged Partial Agreement (EPA) on Cultural Routes oversees 29 routes connecting culture and heritage across Europe. Cultural Routes are powerful tools for promoting and preserving these shared and diverse cultural identities. They are a model for grass-roots cultural co-operation, providing important lessons about identity and citizenship through a participative experience of culture. From the European Route of Megalithic Culture with its monuments built as long as 6 000 years ago, to the ATRIUM route of Architecture of Totalitarian Regimes, the routes contain elements of our past which help us to understand the present and to approach the future with confidence. The Cultural Routes also stimulate thematic cultural tourism in lesserknown parts of the continent, helping to develop economic and social stability in Europe. This first ever step-by-step guide to the design and management of Council of Europe Cultural Routes will be an essential reference for route managers, project developers, students and researchers in cultural tourism and related subjects. It addresses aspects ranging from the Council of Europe's conventions to co-creation, fund-raising and governance, and it explores a Cultural Route model that has evolved into an exemplary system for sustainable, transnational co-operation and that has proved to be a successful road map for socio-economic development, cultural heritage promotion and intergenerational communication. The Council of Europe EPA on Cultural Routes is the result of our successful co-operation with the Luxembourg Ministry of Culture and the European Union. Increasingly, other organisations, such as the United Nations World Tourism Organization, are joining this project. This handbook was funded by the third European Commission/Council of Europe Joint Programme on Cultural Routes.

## **Cultural Routes management: from theory to practice**

Broken Voices is the first English-language book on Korea's rich folksong heritage, and the first major study of the effects of Japanese colonialism on the intangible heritage of its former colony. Folksongs and other music traditions continue to be prominent in South Korea, which today is better known for its technological prowess and the Korean Wave of popular entertainment. In 2009, many Koreans reacted with dismay when China officially recognized the folksong Arirang, commonly regarded as the national folksong in North and South Korea, as part of its national intangible cultural heritage. They were vindicated when versions from both sides of the DMZ were included in UNESCO's Representative List of the Intangible Cultural Heritage of Humanity a few years later. At least on a national level, folksongs thus carry significant political importance. But what are these Korean folksongs about, and who has passed them on over the years, and how? Broken Voices describes how the major repertoires were transmitted and performed in and around Seoul. It sheds light on the training and performance of professional entertainment groups and singers, including kisaeng, the entertainment girls often described as Korean geisha. Personal stories of noted singers describe how the colonial period, the media, the Korean War, and personal networks have affected work opportunities and the standardization of genres. As the object of resentment (and competition) and a source of creative inspiration, the image of Japan has long affected the way in which Koreans interpret their own culture. Roald Maliangkay describes how an elaborate system of heritage management was first established in modern Korea and for what purposes. His analysis uncovers that folksong traditions have changed significantly since their official designation; one major change being gender representation and its effect on sound and performance. Ultimately, Broken Voices raises an important issue of cultural preservation—traditions that fail to attract practitioners and audiences are unsustainable, so compromises may be unwelcome, but imperative.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

"This is the second issue in the Global Re-introduction Perspectives series and has been produced in the same standardized format as the previous one. The case-studies are arranged in the following order: Introduction, Goals, Success Indicators, Project Summary, Major Difficulties Faced, Major Lessons Learned, Success of Project with reasons for success or failure. For this second issue we received a total of 72 case-studies compared to 62 in the last issue. These case studies cover the following taxa as follows: invertebrates (9), fish (6), amphibians (5), reptiles (7), birds (13), mammals (20) and plants (12) ... We hope the information presented in this book will provide a broad global perspective on challenges facing re-introduction projects trying to restore biodiversity"--Pritpal S. Soorae.

A CD-ROM and DVD set extracted from the 'The Art of Africa: A Resource for Educators.' The CD-ROM contains a PDF of 'The Art of Africa: A Resource for Educators,' which features forty traditional works of African art in The Metropolitan Museum of Art. It includes a brief overview of the Metropolitan's collection of African art; a short introduction and history of Africa; an explanation of the role of visual expression in the continent; descriptions of the featured works of art and background about the materials and techniques that were used to create them ... The DVD, 'Ci Wara Invocation,' presents the highlights of a dozen ci wara performances in Bamana communities in present-day Mali that were recorded by five different observers between 1970-2002. Among the Bamana, oral traditions credit a mythical being named Ci Wara, a divine being half mortal and half antelope, with the introduction of agriculture to the Bamana. The ci wara performances are part of biannual celebrations that either launch or conclude the farming season.-- Container

This book proposes a new, pragmatic way of approaching economic development which features policy learning based on a comparison of international best policy practices. While the important role of government in promoting private sector development is being recognized, policy discussion often remains general without details as to what exactly to do and how to avoid common pitfalls. This book fills the gap by showing concrete policy contents, procedures, and organizations adopted in high-performing East Asian economies. Natural resources and foreign aid and investment can take a country to a certain income level, but growth stalls when given advantages are exhausted. Economies will be caught in middle income traps if growth impetus is not internally generated. Meanwhile, countries that have soared to high income introduced mindset, policies, and institutions that encouraged, or even forced, accumulation of human capital – skills, technology, and knowledge. How this can be done systematically is the main topic of policy learning. However, government should not randomly adopt what Singapore or Taiwan did in the past. A continued march to prosperity is possible only when policy makers acquire capability to formulate policy suitable for local context after studying a number of international experiences. Developing countries wanting to adopt effective industrial strategies but not knowing where to start will benefit greatly by the ideas and hands-on examples presented by the author. Students of development economics will find a new methodological perspective which can supplement the ongoing industrial policy debate. The book also gives an excellent account of national pride and pragmatism exhibited by officials in East Asia who produced remarkable economic growth, as well as serious effort by an African country to emulate this miracle.

This publication contains the key proceedings and technical report of the Second International Conference on Climate Change and Tourism, held in Davos, Switzerland, 1-3 October 2007. The Davos Declaration and the summary of the conference debates demonstrate a clear commitment of the tourism sector to address climate change issues, and provide concrete recommendations for actions. The extensive technical report included in this publication was commissioned to an international team of experts by the World Tourism Organization (UNWTO), the United Nations Environment Programme (UNEP) and the World Meteorological Organization (WMO). It provides a synthesis of the state of knowledge about current and future likely impacts of climate change on tourism destinations around the world, possible implications for tourist demand, current levels and trends in GHG emissions from the tourism sector, and an overview of policy and management responses adopted by the key stakeholder groups (international organizations, public administrations, the tourism industry) with respect to adaptation to and mitigation of climate change. This publication is principally aimed at the tourism industry and government organizations at the different levels, who will have the primary responsibility of developing mitigation and adaptation strategies to respond to the challenges that global climate change will bring to the tourism sector. It also constitutes an important tool for international agencies, nongovernmental organizations (NGOs) and financial institutions.

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's

own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. "Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features a discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, *The Guardian* The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

## **Understanding Media**

"*Pinus radiata* (radiata pine) is a versatile, fast-growing, medium-density softwood, suitable for a wide range of end-uses. Its silviculture is highly developed, and is built on a firm foundation of over a century of research,

observation and practice. Radiata pine is often considered a model for growers of other plantation species. This book explores current knowledge of, and experience with radiata pine forest plantation management and examines its long-term sustainability. Radiata pine management needs to integrate the biological aspects of tree-growing, with socio-economics, management objectives, practical considerations and other constraints and opportunities. Although stands of radiata pine may appear to be simple, they are actually quite complex ecosystems because they contain large, long-lived trees that change dramatically over time and interact in changing ways with the environment and with other organisms. The focus of this book is on the principles and practices of growing radiata pine sustainably. It also looks ahead to emerging challenges facing radiata pine plantation management, such as the effects of climate change, new diseases and other threats, and meeting changing product needs and societal demands.\

On Diary is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Lejeune is a leading European critic and theorist of diary and autobiography. His landmark essay, "The Autobiographical Pact," has shaped life writing studies for more than thirty years, and his many books and essays have repeatedly opened up new vistas for scholarship. As Michael Riffaterre notes, "Lejeune's work on autobiography is the most original, powerful, effective approach to a difficult subject. . . . His style is very personal, lively. It grabs the reader as scholarship rarely does. Lejeune's erudition and methodology are impeccable." Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies.

Oni, ubiquitous supernatural figures in Japanese literature, lore, art, and religion, usually appear as demons or ogres. Characteristically threatening, monstrous creatures with ugly features and fearful habits, including cannibalism, they also can be harbingers of prosperity, beautiful and sexual, and especially in modern contexts, even cute and lovable. There has been much ambiguity in their character and identity over their long history. Usually male, their female manifestations convey distinctively gendered social and cultural meanings. Oni appear frequently in various arts and media, from Noh theater and picture scrolls to modern fiction and political propaganda. They remain common figures in popular Japanese anime, manga, and film and are becoming embedded in American and international popular culture through such media. Noriko Reider's book is the first in English devoted to oni. Reider fully examines their cultural history, multifaceted roles, and complex significance as "others" to the Japanese.

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live "this way." Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it

without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. ## **Japanese Demon Lore**

Global society in the 21st century is facing challenges of improving the quality of air, water, soil and the environment and maintaining the ecological balance. Environmental pollution, thus, has become a major global concern. The modern growth of industrialization, urbanization, modern agricultural development and energy generation has resulted in the indiscriminate exploitation of natural resources for fulfilling human desires and needs, which has contributed in disturbing the ecological balance on which the quality of our environment depends. Human beings, in the truest sense, are the product of their environment. The man-environment relationship indicates that pollution and deterioration of the environment have a social origin. The modern technological advancements in chemical processes/operations have generated new products, resulting in new pollutants in such abundant levels that they are above the self-cleaning capacity of the environment. One of the major issues in recent times is the threat to human lives due to the progressive deterioration of the environment from various sources. The impact of the pollutants on the environment will be significant when the accumulated pollutants load will exceed the carrying capacity of the receiving

environment. Sustainable development envisages the use of natural resources, such as forests, land, water and fisheries, in a sustainable manner without causing changes in our natural world. The Rio de Janeiro-Earth Summit, held in Brazil in 1992, focused on sustainable development to encourage respect and concern for the use of natural resources in a sustainable manner for the protection of the environment. This book will be beneficial as a source of educational material to post-graduate research scholars, teachers and industrial personnel for maintaining the balance in the use of natural sources for sustainable development.
