Franklin Mcpherson Buckland

Eavesdropping The Psychotherapist In Film And Television Introduction

Eavesdropping

What can depictions of psychotherapy on screen teach us about ourselves? In *Eavesdropping*, a selection of contributions from internationally-based film consultants, practicing psychotherapists and interdisciplinary scholars investigate the curious dynamics that occur when films and television programmes attempt to portray the psychotherapist, and the complexities of psychotherapy, for popular audiences. The book evaluates the potential mismatch between the onscreen psychotherapist, whose *raison d'être* is to entertain and engage global audiences, and the professional, real-life counterpart, who becomes intimately involved with the dramas of their patients. While several contributors conclude that actual psychotherapy, and the way psychotherapists and their clients grapple with notions of fantasy and reality, would make a rather poor show, *Eavesdropping* demonstrates the importance of psychotherapy and psychotherapists on-screen in assisting us to wrestle with the discomfort – and humour - of our lives. Offering a unique insight into perceptions of psychotherapy, *Eavesdropping* will be essential and insightful reading for analytical psychologists, psychoanalysts, academics and students of depth psychology, film and television studies, media studies and literature, as well as filmmakers.

The Oxford Handbook of Psychotherapy Ethics

The Oxford Handbook of Psychotherapy Ethics explores a whole range of ethical issues in the heterogenous field of psychotherapy. It will be an essential book for psychotherapists in clinical practice and valuable for

those professionals providing mental health services beyond psychology and medicine, including counsellors and social workers.

Celebrating the Wounded Healer Psychotherapist

Why would someone decide to become a psychotherapist? It is well-known within the field that psychoanalysts and psychotherapists are often drawn to their future professions as a result of early traumatic experiences and being helped by their own psychoanalytic treatment. While dedicating their lives to relieving emotional suffering without being judgmental, they fear compromising their reputations if they publicly acknowledge such suffering in themselves. This phenomenon is nearly universal among those in the helping professions, yet there are few books dedicated to the issue. In this innovative book, Farber and a distinguished range of contributors examine how the role of the 'wounded healer' was instrumental in the formulation of psychoanalysis, and how using their own woundedness can help clinicians work more effectively with their patients, and advance theory in a more informed manner. *Celebrating the Wounded Healer Psychotherapist* will be of interest to psychoanalysts and psychoanalytic psychotherapists, graduate students in clinical disciplines including psychology, social work, ministry/chaplaincy and nursing, as well as the general public.

Movies and Mental Illness

The popular, critically acclaimed text on psychopathology in movies – now including the latest movies and more Explores films according to the diagnostic criteria of DSM-5 and ICD-11 Provides psychological ratings of nearly 1,500 films Includes downloadable teaching materials Films can be a powerful aid to learning about mental illness and psychopathology – for practitioners and students in fields as diverse as psychology, psychiatry, social work, medicine, nursing, counseling, literature, or media studies, and for anyone interested in mental health. Watching films relevant to mental health can actually help you become a more productive therapist and a more astute diagnostician. *Movies and Mental Illness*, written by an eminent clinical psychologist (who is also a movie aficionado), has established a reputation as a uniquely enjoyable and highly memorable text for learning about psychopathology. This new edition has been completely revised to explore current issues, such as children's screentime and celebrities with mental illness, and to include the numerous films that have been released since the last edition. The core clinical chapters raise provocative questions about differential diagnosis (according to the DSM-5 and ICD-11) for the primary characters portrayed in the films. Included are also a full index of films; sample course syllabus; ratings of close to 1,500 films; fascinating appendices, such as "Top 50 Heroes and Villains," psychotherapists in movies, and misconceptions about mental illness in movies. Accompanying the new edition are downloadable resources for teachers that include critical questions and topics for discussion, as well as fabricated case histories based on movie characters with Mini-Mental State Examinations that help explain, teach, and encourage discussion about important mental health disorders. In addition, the author plans a regular series of online "Spotlights" articles that will critically examine the psychological content of new movies as they are released.

The Happiness Illusion

The West has never been more affluent yet the use of anti-depressants is on the increase to the extent that the World Health Organisation has declared it a major source of concern. How has this state of affairs come about and what can be done? Television and advertising media seem to know. Wherever we look they offer countless remedies for our current situation - unfortunately none of them seem to work. *The Happiness Illusion* explores how the metaphorical insights of fairy-tales have been literalised and turned into commodities. In so doing, their ability to educate and entertain has largely been lost. Instead advertising and television sell us products that offer to magically transform the way we look, how we age, where we live –both in the city and the countryside, the possibility of new jobs, and so forth. All of these are supposed to make us happy. But despite the allure of 'retail therapy' modern magic has lost its spell. What then are the

sources of happiness in our contemporary society? Through a series of fairy-tales *The Happiness Illusion: How the media sold us a fairytale* looks at topics such as age, gender, marriage and rom-coms, Nordic Noir and the representations of therapy on television. In doing so it explores alternative ways to relate to the world in a symbolic and less literal manner – it suggests that happiness comes by making sure we don't fall under the spell of the illusionary promises of contemporary television and advertising. Instead, happiness comes from being ourselves – warts and all. This book will be of interest to Jungian academics, film, media and cultural studies academics, social psychologists and their students, as well as reaching out to those interested in fairy-tale studies, psychotherapists and educated cinema goers. Luke Hockley PhD, is Research Professor of Media Analysis, at the University of Bedfordshire, UK. He is a practicing psychotherapist and is registered with the United Kingdom Council for Psychotherapy (UKCP). Luke is joint Editor in Chief of the *International Journal of Jungian Studies (IJJS)* and a member of the Advisory Board for the journal *Spring* and lectures widely. www.lukehockley.com Nadi Fadina is a media entrepreneur and a managing partner in an international film fund. She is involved in a variety of arts and media related projects, both in profit and non-profit spheres. She teaches Film Business in the University of Bedfordshire, however, her academic interests outreach spheres of business and cover ideology, Russian fairytales, sexuality, politics, anthropology, and cinema. www.nadi-fadina.com

Hospitality, Rape and Consent in Vampire Popular Culture

This unique study explores the vampire as host and guest, captor and hostage: a perfect lover and force of seductive predation. From *Dracula* and *Carmilla*, to *True Blood* and *The Originals*, the figure of the vampire embodies taboos and desires about hospitality, rape and consent. The first section welcomes the reader into ominous spaces of home, examining the vampire through concepts of hospitality and power, the metaphor of threshold, and the blurred boundaries between visitation, invasion and confinement. Section two reflects upon the historical development of vampire narratives and the monster as oppressed, alienated Other. Section three discusses cultural anxieties of youth, (im)maturity, childhood agency, abuse and the age of consent. The final section addresses vampire as intimate partner, mapping boundaries between invitation, passion and coercion. With its fresh insight into vampire genre, this book will appeal to academics, students and general public alike.

Psychotherapy, Literature and the Visual and Performing Arts

This book explores the relevance of literature and the performing and visual arts for effective clinical psychotherapy. There is a growing interest in the use of the arts in psychotherapy, in part due to an increasing awareness of the limitations in verbal communication and scepticism towards traditional forms of medical treatment. Gathering together perspectives from international practitioners this volume embraces the value of a range of mediums to psychotherapy, from film and photo-therapy to literature and narrative therapy. Based on theoretical studies, clinical expertise and experiential learning, authors offer detailed guidelines on the value of various art forms in practice.

TV in the USA [3 volumes]

This three-volume set is a valuable resource for researching the history of American television. An encyclopedic range of information documents how television forever changed the face of media and continues to be a powerful influence on society. What are the reasons behind enduring popularity of television genres such as police crime dramas, soap operas, sitcoms, and "reality TV"? What impact has television had on the culture and morality of American life? Does television largely emulate and reflect real life and society, or vice versa? How does television's influence differ from that of other media such as newspapers and magazines, radio, movies, and the Internet? These are just a few of the questions explored in the three-volume encyclopedia *TV in the USA: A History of Icons, Idols, and Ideas*. This expansive set covers television from 1950 to the present day, addressing shows of all genres, well-known programs and short-lived series alike, broadcast on the traditional and cable networks. All three volumes lead off with a

keynote essay regarding the technical and historical features of the decade(s) covered. Each entry on a specific show investigates the narrative, themes, and history of the program; provides comprehensive information about when the show started and ended, and why; and identifies the star players, directors, producers, and other key members of the crew of each television production. The set also features essays that explore how a particular program or type of show has influenced or reflected American society, and it includes numerous sidebars packed with interesting data, related information, and additional insights into the subject matter.

The Routledge International Handbook of Jungian Film Studies

Winner of the IAJS award for best edited book of 2018! The Routledge International Handbook of Jungian Film Studies weaves together the various strands of Jungian film theory, revealing a coherent theoretical position underpinning this exciting recent area of research, while also exploring and suggesting new directions for further study. The book maps the current state of debates within Jungian orientated film studies and sets them within a more expansive academic landscape. Taken as a whole, the collection shows how different Jungian approaches can inform and interact with a broad range of disciplines, including literature, digital media studies, clinical debates and concerns. The book also explores the life of film outside cinema - what is sometimes termed 'post-cinema' - offering a series of articles exploring Jungian approaches to cinema and social media, computer games, mobile screens, and on-line communities. The Routledge International Handbook of Jungian Film Studies represents an essential resource for students and researchers interested in Jungian approaches to film. It will also appeal to those interested in film theory more widely, and in the application of Jung's ideas to contemporary and popular culture.

Cultures of Representation

Cultures of Representation is the first book to explore the cinematic portrayal of disability in films from across the globe. Contributors explore classic and recent works from Belgium, France, Germany, India, Italy, Iran, Japan, Korea, Mexico, Netherlands, Russia, Senegal, and Spain, along with a pair of globally resonant Anglophone films. Anchored by David T. Mitchell and Sharon L. Snyder's coauthored essay on global disability-film festivals, the volume's content spans from 1950 to today, addressing socially disabling forces rendered visible in the representation of physical, developmental, cognitive, and psychiatric disabilities. Essays emphasize well-known global figures, directors, and industries – from Temple Grandin to Pedro Almodóvar, from Akira Kurosawa to Bollywood – while also shining a light on films from less frequently studied cultural locations such as those portrayed in the Iranian and Korean New Waves. Whether covering postwar Italy, postcolonial Senegal, or twenty-first century Russia, the essays in this volume will appeal to scholars, undergraduates, and general readers alike.

The Encyclopedia of Contemporary Spanish Films

Under the Franco regime (1939-1976), films produced in Spain were of poor quality, promoted the regime's agenda, or were heavily censored. After the dictator's death, the Spanish film industry transitioned into a new era, one in which artists were able to more freely express themselves and tackle subjects that had been previously stifled. Today, films produced in Spain are among the most highly regarded in world cinema. The Encyclopedia of Contemporary Spanish Films features nearly 300 entries on the written by a host of international scholars and film critics. Beginning with movies released after Franco's death, this volume documents four decades of films, directors, actresses and actors of Spanish cinema. Offering a comprehensive survey of films, the entries address such topics as art, culture, society and politics. Each includes comprehensive production details and provides brief suggestions for further reading. Through its examination of the films of the post-Franco period, this volume offers readers valuable insights into Spanish history, politics, and culture. An indispensable guide to one of the great world cinemas, The Encyclopedia of Contemporary Spanish Films will be of interest to students, academics, and the general public alike.

Madness, Art, and Society

How is madness experienced, treated, and represented? How might art think around – and beyond – psychiatric definitions of illness and wellbeing? *Madness, Art, and Society* engages with artistic practices from theatre and live art to graphic fiction, charting a multiplicity of ways of thinking critically with, rather than about, non-normative psychological experience. It is organised into two parts: ‘Structures: psychiatrists, institutions, treatments’, illuminates the environments, figures and primary models of psychiatric care, reconsidering their history and contemporary manifestations through case studies including David Edgar’s *Mary Barnes* and Milos Forman’s *One Flew Over the Cuckoo’s Nest*. ‘Experiences: realities, bodies, moods’, problematises diagnostic categories and proposes more radically open models of thinking in relation to experiences of madness, touching upon works such as Richard Kelly’s *Donnie Darko* and Duncan Macmillan’s *People, Places, and Things*. Reading its case studies as a counter-discourse to orthodox psychiatry, *Madness, Art, and Society* seeks a more nuanced understanding of the plurality of madness in society, and in so doing, offers an outstanding resource for students and scholars alike.

Seriality Across Narrations, Languages and Mass Consumption

The contributions gathered in this volume define and discuss concepts, themes, and theories related to contemporary audiovisual seriality. The series investigated include *Black Mirror*, *Game of Thrones*, *House of Cards*, *Penny Dreadful*, *Sherlock*, *Orange Is the New Black*, *Stranger Things*, *Vikings*, and *Westworld*, to mention just some. Including contributions from social and media studies, linguistics, and literary and translation studies, this work reflects on seriality as a process of social, linguistic and gender/genre transformation. It explores the dynamics of reception, interaction, and translation; the relationship between authorship and mass consumption; the phenomena of multimodality, and intertextuality.

Psychotherapists on Film, 1899-1999

How long have psychotherapists been depicted in films? Nearly as long as there have been films—or psychotherapists, for that matter. This isn’t surprising if one considers that the Freudian revolution in psychology and the invention of motion pictures occurred at about the same time. What may be surprising is the sheer number of times that psychotherapists, in their many guises, have shown up in the movies and how their depiction has reflected changing social attitudes about psychotherapy over the last century. This comprehensive worldwide filmography examines over 5000 movies. Films in which mental health professionals appear, or in which others act in that capacity, are listed alphabetically. A preface explains the criteria for a film’s inclusion, and a lengthy introduction and guide to the filmography explores the changing social attitudes mirrored by the movies. Appendices list the titles by decade; alternate titles for many films; recent releases; and qualifying adult films.

A Skin for Thought

A French analyst discusses the interface between psychoanalysis and psychology. *A Skin for Thought* takes the form of ten transcribed discussions between Didier Anzieu and Gilbert Tarrab, recorded in Montreal during Anzieu's lecture tour there. A practitioner and theoretician of individual and group analysis, Anzieu speaks frankly of the origins and development of his vocation, the stages of his training, and the evolution of his research, and explains the principal ideas he has developed: group illusion; the psychic tasks of creativity, and 'the Skin Ego'. In answer to Gilbert Tarrab's probing questions, Didier Anzieu recalls the distinctive atmosphere of his childhood, a first analysis with Lacan, the events of May 1968 at Nanterre, his literary ambitions, and his enthusiasm for psychodrama.

The Laughing Baby

Few things in life are more delightful than sharing in the laughter of a baby. Until now, however,

psychologists and parenting experts have largely focused on moments of stress and confusion. Developmental psychologist Caspar Addyman decided to change that. Since 2012 Caspar has run the Baby Laughter project, collecting data, videos and stories from parents all over the world. This has provided a fascinating window into what babies are learning and how they develop cognitively and emotionally. Deeper than that, he has observed laughter as the purest form of human connection. It creates a bond that parents and infants share as they navigate the challenges of childhood. Moving chronologically through the first two years of life, *The Laughing Baby* explores the origin story for our incredible abilities. In the playful daily lives of babies, we find the beginnings of art, science, music and happiness. Our infancy is central to what makes us human, and understanding why babies laugh is key to understanding ourselves.

Nietzsche and Jung

Was Jung's interpretation and assessment of Nietzsche accurate? Nietzsche and Jung considers the thought and personalities of two icons of twentieth century philosophical and psychological thought, and reveals the extraordinary connections between them. Through a thorough examination of their work, Nietzsche and Jung succeeds in illuminating complex areas of Nietzsche's thought and resolving ambiguities in Jung's reception of these theories. The location and analysis of the role played by opposites in the whole self according to Jung is considered, revealing the full extent of Nietzsche's influence. This rigorous and original analysis of Jungian theory and its philosophical roots, supported by Jung's seminars on Nietzsche's Zarathustra, leads to the development of a fresh interpretation of the theories of both. The shared model of selfhood is put into practice as the personalities of Nietzsche and Jung are evaluated according to the other's criteria for mental health, attempting to determine whether Nietzsche and Jung were themselves whole. Nietzsche and Jung demonstrates how our understanding of analytical psychology can be enriched by investigating its philosophical roots, and considers whether the whole self is a realistic possibility for each of us. This book will prove fascinating reading for students in psychology, philosophy and religion as well as practicing Jungian analysts.

Goodnight, Beautiful

A handsome psychotherapist. His lonely wife. And in his home office ceiling, a vent. You'd listen too, wouldn't you?... For fans of *The Silent Patient* and *The Couple Next Door*, comes this irresistible new thriller from the New York Times bestseller that will have you gripped to the edge of your seat. Newlyweds, Sam Statler and Annie Potter are ready to begin their lives together in a small town in upstate New York. Whilst Annie spends most of her time alone, Sam, her therapist husband, works long hours in his home office, tending to the egos of his mostly female clientele. Little does Sam know that through a vent in the ceiling, every word of his sessions can be heard from the room upstairs. The pharmacist's wife, contemplating a divorce. The well-known painter whose boyfriend doesn't satisfy her in bed. Who could resist eavesdropping? Everything is fine until the French girl in the green Mini Cooper shows up, and Sam disappears into thin air, throwing a wrench into Sam and Annie's happily ever after. **YOUR FAVOURITE AUTHORS LOVE GOODNIGHT, BEAUTIFUL . . .** 'Goodnight Beautiful is a thrill-ride packed with twists. Enthralling, sharp, and clever, this book will keep you guessing' **SAMANTHA DOWNING**, bestselling author of *MY LOVELY WIFE* 'The most suspenseful novel you'll read this year' **A. J. FINN**, bestselling author of *THE WOMAN IN THE WINDOW* **READERS LOVE GOODNIGHT, BEAUTIFUL . . .** 'This book was fabulous! It was dark and super twisty and absolutely addicting. I read it in less than 24 hours and didn't want to put it down to sleep!' 'This kept me gripped and desperate to keep reading' 'I loved this book, brilliantly crafted and an immersive plot that was full of surprises' 'Definitely one of the best books I've read recently. An absolute corker that justly deserves five stars' 'An exciting domestic thriller that started off as a literal rollercoaster and never slowed down' 'If you love a story full of twists and mystery then this is the one for you!'

The Urban Uncanny

The Urban Uncanny explores through ten engaging essays the slippage or mismatch between our expectations of the city—as the organised and familiar environments in which citizens live, work, and go about their lives—and the often surprising and unsettling experiences it evokes. The city is uncanny when it reveals itself in new and unexpected light; when its streets, buildings, and people suddenly appear strange, out of place, and not quite right. Bringing together a variety of approaches, including psychoanalysis, historical and contemporary case study of cities, urban geography, film and literary critique, the essays explore some of the unsettling mismatches between city and citizen in order to make sense of each, and to gauge the wellbeing of city life more generally. Essays examine a number of cities, including Edmonton, London, Paris, Oxford, Las Vegas, Berlin and New York, and address a range of issues, including those of memory, death, anxiety, alienation, and identity. Delving into the complex repercussions of contemporary mass urban development, *The Urban Uncanny* opens up the pathological side of cities, both real and imaginary. This interdisciplinary collection provides unparalleled insights into the urban uncanny that will be of interest to academics and students of urban studies, urban geography, psychoanalysis, cultural studies, social studies and film studies, and to anyone interested in the darker side of city life.

Science Fiction and Psychology

The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. *Science Fiction and Psychology* goes beyond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the ascendancy of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. *Science Fiction and Psychology* also considers how psychology itself has made use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present.

The Manchurian Candidate

'Brilliant...wild and exhilarating' New Yorker Sgt Raymond Shaw is a hero of the first order. He's an ex-prisoner of war who saved the life of his entire outfit, a winner of the Congressional Medal of Honor, the stepson of an influential senator...and the perfect assassin. Brainwashed during his time as a POW he is a 'sleeper', a living weapon to be triggered by a secret signal. He will act without question, no matter what order he is made to carry out. To stop Shaw, his former commanding officer must uncover the truth behind a twisted conspiracy of torture, betrayal and power that will lead both to the highest levels of the government. - and to Shaw's own past...

Wild/lives

Wild/lives draws on myth, popular culture and analytical psychology to trace the machinations of 'trickster' in contemporary film and television. This archetypal energy traditionally gravitates toward liminal spaces – physical locations and shifting states of mind. By focusing on productions set in remote or isolated spaces, Terrie Waddell explores how key trickster-infused sites of transition reflect the psychological fragility of their willing and unwilling occupants. In differing ways, the selected texts – *Deadwood*, *Grizzly Man*, *Lost*, *Solaris*, *The Biggest Loser*, *Amores Perros* and *Repulsion* – all play with inner and outer marginality. As this study demonstrates, the dramatic potential of transition is not always geared toward resolution. Prolonging the anxiety of change is an increasingly popular option. Trickster moves within this wildness and instability to agitate a form of dialogue between conscious and unconscious processes. Waddell's imaginative

interpretation of screen material and her original positioning of trickster will inspire students of media, cinema, gender and Jungian studies, as well as academics with an interest in the application of Post-Jungian ideas to screen culture.

Psychoanalysis Online

Psychoanalysis Online: Mental Health, Teletherapy and Training, is an international collaboration by psychotherapists and psychoanalysts who consider the impact of virtual reality on our society and the uses of communications technology for analytic treatment and professional training. Having examined the impact of communications technology on mental health and relationships, the authors explore its use in analytical treatment conducted on the telephone and over the internet, and review its problems and possibilities. They provide a multi-faceted view of it, an ethical stance in relation to it, and evidence from which to judge its effectiveness. Looking into the future they imagine a time when technology-supported analytic treatment may be not only convenient as a supplement to in-person treatment but also preferable for some patients and therapists in various circumstances. Psychoanalysis Online: Mental Health, Teletherapy and Training invigorates the debate about technology and its responsible use in psychotherapy and psychoanalysis and in distance learning programs for mental health professionals.

Dreaming the Myth Onwards

Dreaming the Myth Onwards shows how a revised appreciation of myth can enrich our daily lives, our psychological awareness, and our human relationships. Lucy Huskinson and her contributors explore the interplay between myth, and Jungian thought and practice, demonstrating the philosophical and psychological principles that underlie our experience of psyche and world. Contributors from multi-disciplinary backgrounds throughout the world come together to assess the contemporary relevance of myth, in terms of its utility, its effectual position within Jungian theory and practice, and as a general approach for making sense of life. As well as examining the more conscious facets of myth, this volume discusses the unconscious psychodynamic \"processes of myth\"

The Lost Child Complex in Australian Film

In *The Lost Child Complex in Australian Film*, Terrie Waddell looks at the concept of the 'lost child' from a psychological and cultural perspective. Taking an interdisciplinary Jungian approach, she re-evaluates this cyclic storytelling motif in history, literature, and the creative arts, as the nucleus of a cultural complex.

The Wrong Family

From the #1 New York Times Bestselling Author of *Never Never*, co-written with Colleen Hoover! From the author of the New York Times bestseller *The Wives* comes another twisted psychological thriller guaranteed to turn your world upside down—an instant bestseller! Have you ever been wrong about someone? Juno was wrong about Winnie Crouch. Before moving in with the Crouch family, Juno thought Winnie and her husband, Nigel, had the perfect marriage, the perfect son—the perfect life. Only now that she's living in their beautiful house, she sees the cracks in the crumbling facade are too deep to ignore. Still, she isn't one to judge. After her grim diagnosis, the retired therapist simply wants a place to live out the rest of her days in peace. But that peace is shattered the day Juno overhears a chilling conversation between Winnie and Nigel... She shouldn't get involved. She really shouldn't. But this could be her chance to make a few things right. Because if you thought Juno didn't have a secret of her own, then you were wrong about her, too. From the wickedly dark mind of bestselling author Tarryn Fisher, *The Wrong Family* is a taut new thriller that's riddled with twists in all the right places. "The Wrong Family is your new obsession. It's full of twists you'll never see coming and you'll be breathless until the end. Trust me: you've never read anything like this."—Colleen Hoover, #1 New York Times bestselling author How far will one twin go to uncover where her "good half" has gone? Find out in *Good Half Gone*, #1 New York Times Bestselling author Tarryn

Fisher's next riveting suspense novel! Looking for more great reads by Tarryn Fisher? Don't miss: Never Never The Wives An Honest Lie

Portnoy's Complaint

The groundbreaking novel from the Pulitzer Prize-winning author of *American Pastoral* that originally propelled its author to literary stardom: told in a continuous monologue from patient to psychoanalyst, this masterpiece draws us into the turbulent mind of one lust-ridden young Jewish bachelor named Alexander Portnoy. "Deliciously funny...absurd and exuberant, wild and uproarious...a brilliantly vivid reading experience." —The New York Times Book Review "Touching as well as hilariously lewd.... Roth is vibrantly talented." —New York Review of Books *Portnoy's Complaint* n. [after Alexander Portnoy (1933-)] A disorder in which strongly-felt ethical and altruistic impulses are perpetually warring with extreme sexual longings, often of a perverse nature. Spielvogel says: 'Acts of exhibitionism, voyeurism, fetishism, auto-eroticism and oral coitus are plentiful; as a consequence of the patient's "morality," however, neither fantasy nor act issues in genuine sexual gratification, but rather in overriding feelings of shame and the dread of retribution, particularly in the form of castration.' (Spielvogel, O. "The Puzzled Penis," *Internationale Zeitschrift für Psychoanalyse*, Vol. XXIV, p. 909.) It is believed by Spielvogel that many of the symptoms can be traced to the bonds obtaining in the mother-child relationship.

Shakespeares After Shakespeare

Shakespeare representations in cartoons and comic books; film adaptations; pop music; literature and genre fiction; radio; US and UK television.

The Digital Person

In a revealing study of how digital dossiers are created (usually without our knowledge), the author argues that we must rethink our understanding of what privacy is and what it means in the digital age, and then reform the laws that define and regulate it. Reprint.

Spirit Possession and Trance

Spirit possession is a phenomenon that often elicits a response of fear, particular in those who are ignorant of its meaning and role within its particular religious and cultural traditions. Possession by divine beings (such as spirits or gods) is, however, a key practice in religions worldwide. It is therefore important to gain an understanding of this practice in its cultural context before trying to develop a wider theory about it. This fascinating book contains several case studies that present new interpretations of spirit possession worldwide. The authors show the diversity of possible interpretations and methodological approaches that provide a new insight into the understanding of possession and trance.

Mis/takes

Mis/takes departs from the bulk of screen discourse by applying Jungian and Post-Jungian ideas on unconscious processes to popular film and television. This perspective offers a rich insight into the way that various myths infiltrate popular culture. By examining the function of psychological motifs and symbols in cinema and television, Terrie Waddell opens up another way of thinking about how identity can be constructed and disrupted. *Mulholland Drive*, *Memento*, *The Others*, *The X-Files*, *Twin Peaks*, *The Sopranos*, *Spider*, *Intimacy* and *Absolutely Fabulous* all lend themselves to this approach. The close analysis of these films/programs are guided by a number of core archetypes from trickster and Self to incest and the grotesque. The book's four parts reflect these dominant patterns: Jung, trickster and the screen Mistaken identities, self-deception and the undead Redeemers, bad dads and matricide Excesses of the sad and the

sassy Mis/takes gives readers a chance to engage with screen material in an original and subversive way. This study will be of great interest to Jungian analysts and students of film, cultural studies, media, gender studies and analytical psychology.

Watching the English

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ...Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

The Percy Jackson and the Olympians, Book Three: Titan's Curse

In this third book of the acclaimed series, Percy and his friends are escorting two new half-bloods safely to camp when they are intercepted by a mantichore and learn that the goddess Artemis has been kidnapped.

Digitized Lives

In a remarkably short period of time the Internet and associated digital communication technologies have deeply changed the way millions of people around the globe live their lives. But what is the nature of that impact? In chapters examining a broad range of issues—including sexuality, politics, education, race, gender relations, the environment, and social protest movements—Digitized Lives seeks answers to these central questions: What is truly new about so-called "new media," and what is just hype? How have our lives been made better or worse by digital communication technologies? In what ways can these devices and practices contribute to a richer cultural landscape and a more sustainable society? Cutting through the vast—and often contradictory—literature on these topics, Reed avoids both techno-hype and techno-pessimism, offering instead succinct, witty and insightful discussions of how digital communication is impacting our lives and reshaping the major social issues of our era. The book argues that making sense of digitized culture means looking past the glossy surface of techno gear to ask deeper questions about how we can utilize technology to create a more socially, politically, and economically just world. Companion website available at: culturalpolitics.net/digital_cultures

On Being Moved

In this collective volume the origins, neurosocial support, and therapeutic implications of (pre)verbal intersubjectivity are examined with a focus on implications of the discovery of mirror neurons. Entailing a paradigmatic revolution in the intersection of developmental, social and neural sciences, two radical turnabouts are entailed. First, no longer can be upheld as valid Cartesian and Leibnizian assumptions about monadic subjects with disembodied minds without windows to each other except as mediated by culture. Supported by a mirror system, specified in this volume by some of the discoverers, modes of participant perception have now been identified which entail embodied simulation and co-movements with others in felt immediacy. Second, no longer can be retained the Piagetian attribution of infant egocentricity. Pioneers who have broken new research grounds in the study of newborns, protoconversation, and early speech perception document in the present volume infant capacity for interpersonal communion, empathic identification, and learning by altercentric participation. Pertinent new findings and results are presented on these topics: (i) Origins and multiple layers of intersubjectivity and empathy (ii) Neurosocial support of (pre)verbal intersubjectivity, participant perception, and simulation of mind (iii) From preverbal sharing and early speech perception to meaning acquisition and verbal intersubjectivity (iv) New windows on other-centred movements and moments of meeting in therapy and intervention. Saints, Scholars, and Schizophrenics

"Saints, Scholars, and Schizophrenics, in its original form--now integrally reproduced in the new edition--is a most important seminal study of an Irish community."—Conor Cruise O'Brien

Schizophrenia: the Bearded Lady Disease Volume Two

Man has long searched for the cause and meaning of mental illness. This second book continues in an attempt to answer those questions. The author/compiler has spent 47 years investigating these problems and his conclusion is that severe unconscious bisexual conflict and confusion lie at the root of all mental illness, as difficult to comprehend as this idea may be. The book itself consists of 773 quotations, from a variety of sources, all of which point to the unshakable truth of this hypothesis. This is a fixed law of nature, unassailable and constantly operative in every case. No other species but man is afflicted with mental illness because no other species has either the intellectual power to repress their sexual feelings nor the motivation to do so. The disease we call schizophrenia is but an arbitrary name, which is used to designate the end-stage of a process beginning with a slight neurosis. The more severe the bisexual conflict and confusion in the individual, the more severe the degree of the mental illness which is experienced. Several other investigators in the past have reached this same conclusion, but unfortunately their wisdom went largely unheeded. Hopefully this book will remedy that ill-advised neglect.

Ethical Practice in Grief Counseling

"Gamino and Ritter do an excellent job of providing cogent advice and helpful suggestions for how professionals can manage ethical dilemmas that arise from the practice of grief counseling." -J. William Worden, PhD, ABPP Clinical Psychologist Laguna Niguel, California Author, Grief Counseling and Grief Therapy, 4th Edition (From the Foreword) Essential reading for grief counselors, mental health clinicians, death educators, hospice workers, clergy, funeral directors, and social workers. Grief counselors are confronted daily with a host of serious ethical dilemmas, some so critical that they can drastically change the course of a counselor's practice and career. This practical and authoritative guide serves as a comprehensive handbook for navigating the difficult ethical issues grief counselors confront daily with clients. These include confidentiality, end-of-life issues, intimacies with clients, challenges posed by unnatural deaths, spiritual and cultural considerations, and many more. To tackle these issues head on, Gamino and Ritter present the Five P Model, a customized process for ethical decision-making that will help counselors outline a specific, step-by-step course of action to respond to the ethical dilemma at hand. The book is also rich with case examples, both hypothetical and real-life, to demonstrate how to implement the Five P Model in practice, and apply it to various ethical dilemmas. Among the key topics discussed: How to address ethical problems posed by Internet counseling, such as authenticating identity, securing confidentiality, and intervening in a crisis Death competence on the part of the counselor and how the counselor's own experience of grieving can inform counseling practice Guidance on how to report a colleague or face a complaint How to meet ethical obligations towards clients when moving or closing a practice

Autonomous Horizons

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way Forward* identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.
