Psychoanalytic Structuralist Approach in a Developmental Theoretical Perspective – Freud \u0026 Erikson - Psychoanalytic Structuralist Approach in a Developmental Theoretical Perspective – Freud \u0026 Erikson by Education - M S Teacher 491 views 3 years ago 16 minutes - This video is a psychoanalytic structural approach on human **development**, that demonstrates an understanding of a ...

THE PSYCHOANALYTIC STRUCTURALIST APPROACH IN A DEVELOPMENTAL THEORETICAL PERSPECTIVE

Theoretical Perspectives: demonstrate an understanding of a variety of theoretical perspectives on human development. Explain human development throughout the lifespan according to structuralist [developmental] theoretical perspectives (e.g., the stage theories of Sigmund Freud \u0026 Erik Erikson)

PSYCHOANALYTIC APPROACH \* The psychoanalytic approach describes development as primarily

unconscious, beyond awareness, and heavily influenced by our emotion We must analyze the deeper inner workings of the mind, and symbolic meanings of behaviour to fully understand development

SCHOOL OF THOUGHT \* Psychoanalytic Theory: Co-founder is Josef Breuer (1842-1925) an Austrian physician & physiologist (famous for study with Anna O.); mentor for many years to Freud. +Helping people understand the mind and how it

SIGMUND FREUD (1856-1939) \* Major contributions include exploration of the unconscious, dream analysis, defence mechanisms, 5 psychosexual stages of development, and the use of psychoanalysis (talk therapy) in well- being treatment

ERIK ERIKSON (1902-1994) \* Recognized Freud's contributions, yet disagreed on the sexual aspect, saying it was only one among many factors. Instead of focusing on the 5 psychosexual stages, Erikson explained that we develop in a series of 8 psychosocial stages.

ERIK ERIKSON \*8 psychosocial stages has each stage consists of a unique development in which a crisis must be faced. The more successfully you face this crisis, the healthier the development will be. In the end, you will develop an identity over the lifespan.

Presentations on Life Span Development - Presentations on Life Span Development by American Psychological Association 7,920 views 11 years ago 1 hour, 16 minutes - In this presentation from the 2012 APA/Clark University Workshop for High School Teachers, Debra Park of Rutgers University ...

In this presentation from the 2012 APA/Clark University Workshop for High School Teachers, Debra Park of Rutgers University and West Deptford High School (West Deptford, NJ - retired) discusses the National Standards for High School Psychology Curricula standard area of life span development. She discusses the

MIDUS study (), end of life issues (), and adulthood and aging, such as by addressing maximizing longevity (). Park suggests that many concepts within this area of development are relevant to adolescents and worth devoting time to in the high school psychology curriculum. The Millennial Culture () is also discussed. Michael Sullivan of Hopkinton High School (Hopkinton, MA) discusses stage theories and provides some quick classroom activities to implement within the development unit

Chapter 7 Part A: Life-Span Development of the Brain and Behavior - Chapter 7 Part A: Life-Span Development of the Brain and Behavior by Michael Nadorff 2,630 views 11 years ago 11 minutes, 12 seconds - This is part A of the lecture for Chapter 7: **Life,-Span Development**, of the Brain and Behavior in Dr. Nadorff's Biological Psychology ...

7 Life-Span Development of the Brain and Behavior

The mature human brain has about 100 billion neurons The developing nervous system relies on genetic information and its environment

A zygote is a fertilized egg. A human embryo will develop three cell layers: Ectoderm-outer layer, becomes

the nervous system The neural groove forms between ridges of the ectoderm

The neural tube forms from the neural ridges. The anterior part of the neural tube has three subdivisions-the forebrain, the midbrain, and the hindbrain. A developing human is called an embryo for the first 10 weeks, then is called a fetus.

1. Neurogenesis- mitosis produces neurons from nonneuronal cells 2. Cell migration-cells move to establish distinct populations 3. Differentiation-cells become distinctive neurons or glial cells

Neurogenesis is the production of nerve cells. Nonneuronal cells divide through mitosis and form the ventricular zone. Cells leave the ventricular zone and become either neurons or glial cells.

During cell migration, cells move away from the ventricular layer. • Radial glial cells act as guides for cells to migrate along. • Cell adhesion molecules (CAMs) promote adhesion of parts of the nervous system to guide cells.

Lifespan Development: Physical and Cognitive Development in Early Childhood - Lifespan Development: Physical and Cognitive Development in Early Childhood by Understanding Psychology with Dr. Daniel Kaplin 4,012 views 3 years ago 49 minutes - This video explores the fascinating physical and cognitive **development**, of children in their early years.
