Intro

OT Operational Technology • Technology used for direct monitoring and/or control of industrial equipment, assets, and processes • The term highlights the difference between traditional IT systems and Industrial Control Systems (CS) * Applies to: • Programmable logic controllers (PLCs)

ICS is a catch all term for networks and devices that control industrial processes - A type of network used for process manufacturing computer systems - Require a high level of security because industrial networks control industrial systems can have an impact on human life - Traditionally air-capped for security reasons

Updates / patches present special difficulty since downtime is disrupts business operations • Many industrial systems do not receive updates and therefore are vulnerable to wide array of attacks Best case scenario is to air-gap the SCADA network • If air-gap is not feasible, logical segmentation (VLAN) should be used to add security secure the network Firewalls and IDS/IPS are also critical for protecting industrial networks
